Natural avocado soap spray for thorough cleaning and deep conditioning.

Leather is a high-quality material that requires regular care to remain supple, clean, and well-maintained. Tanned leather (vegetable- or chrome-tanned) expands when exposed to moisture and contracts when the air is dry. Dust, dirt, bacteria, and sweat damage the leather.

Leather must not only be cleaned on the surface; it also needs deep conditioning to preserve its elasticity and suppleness.
The innovative formula of this leather care product cleans thoroughly without damaging the leather or its color. It gently removes dust, dirt, bacteria, and sweat from saddles, harnesses, and boots. The spray formula makes it easy to clean the seams. The active ingredients, combined with plant extracts and essential oils, nourish, disinfect, and clean the leather. The Leather Spray Soap

Product information

restores elasticity to the leather and prevents the growth of mold and bacteria.
