Product information

Color: black

MAGNETOTHERAPY BELLS FOR HORSES

Each therapeutic bell is equipped with 5 neodymium magnets, each generating a Gauss force of 2,600. This can support natural blood circulation in the hooves and limbs, thereby helping to prevent conditions such as laminitis, navicular syndrome, etc.

EFFECTS OF REFLEXOLOGY:
Through the use of reflexology—specifically, magnetic stimulation of the reflex points (Ting) along specific meridians of the horse (the same ones used in acupuncture)—moderate balancing effects are achieved. All effects of reflexology are published on our website www.zandona.net.

LOCAL EFFECTS OF MAGNETIC THERAPY:
Unlike anti-inflammatory drugs, which cause vasoconstriction (and thus slow down blood and lymph circulation, leading to a subsequent slowing of cellular processes), magnet therapy can have a positive effect on pain and swelling, avoids the undesirable side effects of medications, and instead enhances regenerative processes:

- Pain-relieving effect
- Anti-inflammatory effect;
- Increased microcirculation in the cartilage
- Acceleration of lactic acid absorption
- Acceleration of the toxin elimination process
- Acceleration of the osteogenesis process
- Acceleration of cellular processes

Disclaimer:
This product is not a veterinary medication but is intended solely for supportive therapy. This product is not a substitute for a visit to the veterinarian!
