Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Color: black

The Acavallo Hexa Front River gel pad, which is withers-free and wagon-shaped, features a microfleece backing. This pad is raised at the front. The pad is cut out in the withers area to provide more space for the withers. It consists of non-slip, shock-absorbing gel applied to a microfleece backing. With its sophisticated, elegant design and ergonomic shape, it is the perfect complement to the saddle. The ideal pad for riders who use a custom-fitted saddle and value very direct contact with the horse.

One size fits all
