The JALTIKA riding breeches

were developed using an innovative material called “Rider Stretch,” which is extremely flexible and adapts to the rider’s movements.
They feature “Grip System” technology on the inside of the knees.
During production, eight layers of silicone are applied one after another to ensure better grip on the saddle.
They have a water-repellent finish and are suitable for all types of riding, both indoors and outdoors.
The patterned details on the pockets and the Harcour logo below the right pocket are Harcour’s trademark and make these pants a must-have.
