Art.Nr.: HS-40364 / manufacturer: HS Sprenger

180,55CHF

incl. 8,1% VAT plus Shipping

Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Material:	Metal
Thick bridle:	16 mm

Recommended for horses that need to improve their contact.
Olive-head bridles are ideal for horses with sensitive corners of the mouth, as they prevent the lips from getting pinched. The rings attached to the mouthpiece ensure that the bit rests securely in the mouth. This prevents the bit from slipping, allowing the KK ULTRA mouthpiece to act on the tongue from a central position.

Double-jointed bits in which the olive-shaped center piece—compared to conventional bits—is shortened and angled forward at 45°.

Product information

Only at this angle does the center piece rest particularly gently on the tongue. These bits therefore allow for a trusting contact and very subtle rein action.
The innovative KK ULTRA bits utilize the tongue’s sense of touch, which functions with similar sensitivity in horses as it does in humans. The tongue is a highly sensitive sensory organ and amplifies the signals transmitted to the horse’s mouth through the rider’s rein aids. When the reins are tightened, the center piece of the KK ULTRA bits rests firmly on the tongue without squeezing it or exerting pressure on the palate or the sides of the mouth. The connecting rings to the center piece roll over the tongue. The new position of the center piece and the side parts of the bit enhances the tactile sensation of the tongue. The rider’s
rein aids are transmitted more precisely and sensitively to the horse’s mouth. The KK ULTRA bits ensure an incomparably sensitive connection between rider and horse. When switching to a KK ULTRA bit, an immediate improvement in contact is usually noticeable. The anatomically adapted mouthpiece is particularly comfortable for the horse and promotes suppleness, as the rider can apply aids with greater sensitivity.
