Natural herbal cooling gel without camphor

Excellent for tension and muscle pain. Hippo Fresh is a cooling, skin-friendly herbal cooling gel containing arnica, rosemary, calendula, tea tree oil, and mint. It absorbs quickly into the skin and, thanks to its natural active ingredients that stimulate blood circulation, has a cooling and relaxing effect on tendons, joints, and muscles. Hippo Fresh adheres well to the coat and can be used without bandages.

Apply Hippo Fresh generously after strenuous activity and massage in gently without applying pressure.
Repeat as needed every 2–3 hours. Hippo Fresh can also be applied to the legs and the dried-off saddle area as a refreshing treatment after long rides. When using as a compress, use only breathable material.
