Delivery **Mon 09. Nov - Tue 10. Nov 2026**

The special shape of the bar and the curved side pieces adapt perfectly to the anatomy of the horse’s mouth. The special shape of the snaffle bit allows more room for the horse’s tongue and is therefore particularly well-suited for horses that are very sensitive to increased tongue pressure.
Advantages of the double-jointed bit:

- No uncomfortable pressure on the palate
- Even and mouth-friendly distribution of rein pressure across the tongue and bit shank
- Better acceptance
- No “nutcracker” effect
- Facilitates communication between horse and rider

Advantages of the rings:

Product information

- The movable rings on the Icelandic snaffle automatically position the bit correctly in the horse’s mouth when the reins are applied.
- The free-moving rings allow the horse to slightly adjust the position of the bit in its mouth on its own, which stimulates chewing and leads to better acceptance.
- For young horses, as well as for inexperienced riders, the water snaffle should always be the first choice.

Stübben STEELtec Quality:

- No sharp edges that could injure the horse’s mouth
- Long-lasting durability thanks to carefully selected materials
- Special manufacturing techniques minimize wear on the ring holes and joint connections of the bits

Width: 10.5 / 11.5 / 12.5 cm
Ring diameter: 65 mm
Thickness: 12 mm

Width: 13.5 / 14.0 / 14.5 cm
Ring diameter: 70 mm
