CellaVie® Dog ImmunPlus Premium Soft Sticks
— Cell Nutrition for the Immune System. Dietary supplement for dogs

Brief Description

CellaVie® Dog ImmunPlus Premium Soft Sticks combine a unique taste with highly effective cellular nutrition for the immune system. With 81% premium Swiss lamb, natural herbs such as echinacea, and innovative Cell-K30-Nutrition® nucleotides, they specifically support the rapid production of immune cells. The perfect, soft premium snack for unwavering vitality.

Pure indulgence meets Swiss cell research: The cellular shield for a strong immune system

Your dog's immune system works around the clock and relies on extremely rapid cell division. When pathogens attack the body, millions of new immune cells must be produced in the shortest possible time. The problem: To achieve this enormous feat, the body requires massive amounts of cellular building blocks (nucleotides). During such periods of stress, the body's own production quickly reaches its limits, which slows down the immune response.

The solution is CellaVie® Dog ImmunPlus Premium Soft Sticks—a highly innovative combination of genuine premium taste and scientifically proven cellular nutrition. With an outstanding 81% fresh Swiss lamb (including offal), these soft sticks are an absolute treat for any dog's palate. However, it's the smart formula that makes the real difference: it combines natural immune boosters like krill, rose hips, echinacea, and rockrose with 1.5% highly effective Cell-K30-Nutrition® nucleotides. These essential DNA building blocks enable the body to produce new immune cells immediately and ensure that repair processes run smoothly. Reward your dog with the highest Swiss quality and strengthen his natural resilience with every bite.

5 reasons why CellaVie® Dog ImmunPlus Premium Soft Sticks are good for your dog:

- Highest premium quality from Switzerland: With 81% of the finest Swiss lamb (fresh meat and offal), these sticks guarantee excellent palatability and digestibility.
- Measurably accelerates the immune response: The nucleotides they contain support extremely rapid cell division, allowing the immune system to produce new immune cells without delay.
- Harnesses the concentrated power of nature: High-quality ingredients such as krill, MOS, rose hips, echinacea, and rockrose naturally strengthen the body's own defenses.
- Closes the biological supply gap: Since the immune system, which works continuously, cannot produce enough of its own nucleotides to meet its peak demand, this snack provides the crucial external supply.
- Perfect for daily use: The soft, smooth consistency makes portioning particularly easy—ideal as a daily treat that effectively protects the body with cellular nourishment.

Composition & Analytical Constituents:

Composition: Swiss lamb (fresh meat, offal) 81%, plant fibers, krill, potato flakes, mannan-oligosaccharides (MOS), rose hips, echinacea, Cell-K30-Nutrition® nucleotides 1.5%, cistus, minerals.

Analytical Constituents:

- Crude protein: 41.81%
- Crude fat: 19.29%
- Crude fiber: 12.57%
- Crude ash: 5.81%
- Moisture: max. 18.00%

Feeding Recommendations & Usage:

Product information

- Daily feeding recommendation: 1 soft stick per 10 kg of body weight.
- Usage: The soft sticks are ideal as a daily, high-quality treat. For maximum immune support, we recommend combining them with the daily dose of CellaVie® ImmunPlus powder mixture.
- Special Notes: Please always provide your dog with plenty of fresh drinking water.
- Storage: Store in a cool, dry place. After opening, be sure to reseal the package tightly to preserve the fresh, soft texture of the sticks.
