Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Color:	black
Saddle Strap Sizes:	115 cm

The anatomical mesh all-purpose girth consists of several layers. The outer layer features an open polyester mesh structure. The layer beneath it is made of Air-Cycle neoprene This breathable recycled material is equipped with ventilation openings and offers good shock-absorbing properties. The outer layer of the saddle girth consists of a highly breathable polyester mesh structure. The special cooling inner lining ensures that the horse sweats less. The ring in the center can be used to attach auxiliary reins, for example. The triple-elastic material on both sides makes it easier to fasten the girth and provides additional comfort.
