CellaVie® Dog SeniorPlus Powder
: Cellular Nutrition for Vitality. Dietary supplement for dogs

Brief Description

CellaVie® Dog SeniorPlus Powder is a customized cellular nutrition formula for older dogs. It combines proven natural ingredients such as turmeric, krill, and collagen with 15% bioavailable Cell-K30-Nutrition® nucleotides. These help bridge age-related nutritional gaps, support cellular repair and the immune system, and give your senior dog greater vitality and quality of life well into old age (longevity).

The cellular foundation for vitality and longevity well into old age

From a biochemical perspective, aging is the process by which cell division slows down and becomes more prone to errors. In addition, the body's ability to produce essential cellular building blocks (nucleotides) on its own declines dramatically with age, causing the cells to gradually starve. When these building blocks are lacking, the body's overall ability to regenerate declines, the immune response weakens, and your dog's vitality noticeably diminishes. However, since the need for these building blocks remains extremely high, the aging organism is urgently dependent on external sources.

The solution is CellaVie® Dog SeniorPlus Powder—a highly innovative cellular nutrient specifically developed for the needs of senior dogs. The formula combines proven natural ingredients such as collagen, krill, turmeric, stinging nettle, and echinacea with 15% of the revolutionary Cell-K30-Nutrition® nucleotides. These essential building blocks of DNA and RNA significantly support the repair and maintenance of aging cells.

Cell-K30-Nutrition® supports longevity by restoring the resources the aging organism needs for clean and efficient cell division. Close the age-related nutritional gap and give your senior dog sustained vitality, a strong immune system, and the best possible quality of life.

5 reasons why CellaVie® Dog SeniorPlus Powder is good for your senior dog:

- **Promotes vitality well into old age:** Valuable herbs and ingredients such as turmeric, stinging nettle, and krill naturally possess the best properties for maintaining the well-being and mobility of older dogs.
- **Compensates for declining natural production:** Since the body's ability to produce nucleotides declines dramatically with age, the powder prevents cells from gradually starving.
- **Supports cellular repair:** The 15% nucleotides contained in **the formula—**as building blocks of DNA and RNA—are essential for the regeneration and maintenance of aging, stressed cells.
- **Noticeably strengthens the immune system:** A constant supply of these cellular helpers sustains the immune response, which is particularly important as regenerative capacity declines with age.
- **Slows aging at the cellular level (longevity):** The targeted supply of Cell-K30-Nutrition® nucleotides supports longevity by promoting clean and efficient cell division.

Product information

Composition & Analytical Components

Composition: Collagen, krill, Cell-K30-Nutrition® nucleotides 15%, stinging nettle, rose hips, turmeric, echinacea.

Analytical Constituents:

- **Crude protein:** 62.06%
- **Crude Fat:** 9.63%
- **Crude Fiber:** 0.57%
- **Crude ash:** 6.21%

Feeding Recommendation & Usage

- **Daily feeding recommendation:** 1 measuring spoon per 8 kg of body weight.
- **Usage:** Simply mix the powder into your dog's regular food. You can also lightly moisten the mixture with water and then sprinkle it over the food to ensure optimal intake.
- **Special Notes:** Please always provide your dog with plenty of fresh drinking water. A consistent, daily supply is essential for senior dogs to strengthen their immune system over the long term and maintain their vitality.
- **Storage:** Store in a cool, dry place away from light to preserve the effectiveness of the high-quality herbs and ingredients.
