CellaVie® Power Sausage
Cell Nutrition. Dietary supplement for dogs and cats

Brief Description

The CellaVie® Power Sausage is the ultimate functional treat for dogs and cats. With 70% chicken, 8% krill (omega-3 & astaxanthin), and 2% innovative Cell-K30-Nutrition® nucleotides, it not only provides valuable energy but also accelerates cell regeneration, protects the joints, and noticeably strengthens the immune system.

The cellular functional sausage for maximum vitality and rapid recovery in dogs and cats

Whether during intense training, on long outings, or during recovery—active pets perform at a high level and consume enormous amounts of energy and cellular building blocks in the process. Conventional snacks often provide only simple calories, while the body urgently needs specific nutrients for true recovery at the cellular level. Without these, recovery is slowed and performance declines.

The solution is the CellaVie® Power Sausage—a highly innovative cellular food in sausage form that delivers far more than just energy. With 70% juicy chicken (meat and organs), it offers unbeatable palatability. The clever formula combines 8% high-quality krill with 2% of the revolutionary Cell-K30-Nutrition® nucleotides. The krill provides highly efficient omega-3 fatty acids and the natural antioxidant astaxanthin for cellular protection. The nucleotides act as the cells' "builders," accelerating regeneration, strengthening the immune system, and promoting gut health. Since cell biology works according to the same principle in all mammals, this Power Sausage provides universal cellular support for dogs and cats alike.

5 reasons why the CellaVie® Power Sausage is good for your pet:

- Accelerates cellular regeneration: The 2% nucleotides it contains are the natural "building blocks of life" and act like a fast charger for heavily stressed cells.
- Strengthens joints, the heart, and the coat: High-quality krill is rich in essential omega-3 fatty acids, which provide excellent support for joint function, the cardiovascular system, and a shiny coat.
- Provides natural cell protection: The astaxanthin found in krill is an extremely powerful, natural antioxidant that actively protects cells from oxidative stress.
- Supports the immune system and gut health: Nucleotides help the body rapidly produce new immune cells and effectively regenerate the intestinal mucosa.
- Universal treat for dogs & cats: With 70% fresh chicken, this sausage is extremely tasty, firm when sliced, and the perfect, species-neutral treat for training.

Composition & Analytical Constituents

Composition: Chicken (meat & offal) 70%, potato flakes, krill 8%, Cell-K30-Nutrition® nucleotides 2%, sea salt.

Analytical Constituents:

- Crude protein: 16.83%
- Crude fat: 7.69%
- Crude Fiber: 0.85%
- Crude ash: 3.19%
- Moisture: 65.00%

Product information

Feeding Recommendations & Usage

- Daily Feeding Recommendation: Power Sausage can be given at any time as a high-quality treat, training snack, or for targeted recovery after exercise. Please reduce the portion of the complete and balanced diet accordingly to prevent weight gain.
- Usage: The sausage is firm enough to slice and can be easily cut into small cubes suitable for training. It is ideal for dogs and cats.
- Special Notes: Please always provide your pet with plenty of fresh drinking water.
- Storage: Store in a cool, dry place. Once opened, keep refrigerated and consume promptly.
