marstall Magnesium is a high-quality feed supplement that, when used to treat magnesium deficiency, promotes a calm disposition, relaxed muscles, and rapid recovery after exertion.

marstall Magnesium helps the horse relax both mentally and physically.

When magnesium is depleted from the body, tension, anxiety, and cramps can occur. Targeted magnesium supplementation counteracts these effects, as magnesium helps the muscles relax. marstall Magnesium contains magnesium fumarate—an organic form that is particularly well absorbed by the body—as well as vitamins B and E, calcium, and selenium. This combination helps neutralize free radicals and optimize energy metabolism as well as oxygen supply to muscle cells.

Product information

marstall Magnesium calms the nervous system using organic magnesium compounds and supports rapid recovery after exertion.

Ingredients

Grass, high-temperature dried (from the Allgäu region), flaxseed meal, brewer’s grains, magnesium oxide (16.30%), calcium carbonate, brewer’s yeast, magnesium fumarate (1.40%)

Feeding Recommendation

... for horses
that are chronically nervous, restless, or tense: Small horse/pony approx. 20 g = ~ ¾ ML/day
; Thoroughbred approx. 30 g/~ 1 ¼ ML/day
; Warmblood approx. 40 g/~ 1 ¾ ML/day...
Depending on the situation (e.g., competition)
: 5 days before through 2 days after
. Small horse/pony: approx. 40 g / ~ 1 ¾ ML/day
; Thoroughbred: approx. 50 g / ~ 2 ML/day
; Warmblood: approx. 60 g / ~ 2 ½ ML/day
; 1 level measuring spoon (ML) = approx. 25 g

Feeding Instructions
: Our recommendations are generally based on a roughage intake (hay) of 1.5 kg per 100 kg of body weight per day.
It is generally recommended to consult a specialist before feeding a dietary supplement.
