Skin-nourishing lotion; can be used on horses with eczema

Killitch-like skin-care lotion; can be used on horses with eczema

Every summer, horses are bothered by insects and may develop skin reactions from their bites, especially on the mane and tail.

Directions
for Use: Apply EMOUCHINE DERM LAIT to the mane and tail. Intensive care: Apply daily, then every 2 days or more as the animal’s condition improves. Preventative care: Use every 3 days. For maximum protection and to eliminate annoyance from flying insects, use EMOUCHINE Spray.

Product information

Ingredients
: Geraniol, lemon eucalyptus (Eucalyptus citriodora – essential oil), peppermint (Mentha piperita – essential oil), ylang-ylang (Cananga odorata – essential oil), inactives
