Delivery **Mon 09. Nov - Tue 10. Nov 2026**

Natural cooling gel with a cooling effect for horses, containing peppermint. Helps regenerate overworked tendons, joints, and muscles.

- **MINT AND ITS EXTRACTS**
  Mint is a very common plant, and there are many varieties.
  The variety richest in essential oil is peppermint. The essential oil has refreshing properties and is also beneficial for muscle fatigue.

  It consists mainly of: water, dietary fiber, many minerals (calcium, potassium, magnesium, copper, manganese, phosphorus, sodium), vitamins (groups A, B, C, and D), and amino acids.

Product information

Mint has a refreshing, toning, and cleansing effect. When applied to the skin or mucous membranes, it produces a cooling sensation that causes initial vasoconstriction, followed by vasodilation.

DIRECTIONS FOR USE: Carefully clean the area to be treated, then apply and massage until absorbed. Do not apply to open wounds.
