Pelleted Feed Supplement for Horses

Has a calming effect without causing sedation
Compose® 2x is a pelletized feed supplement for horses that are anxious or easily agitated in stressful situations. Because Compose® 2x contains no sedative substances that impair alertness and responsiveness, it is a safe alternative to tranquilizers. Many horses are sensitive to situations such as loading, transport, grooming, visits to the farrier or veterinarian, competitions, separation anxiety, and other stressful situations. This excitability often puts both the horse and the owner in dangerous situations.

Product information

Compose® 2x contains tryptophan, thiamine, and magnesium, which help calm the horse while keeping it alert and attentive. Compose® 2x contains only nutrients, no medications. Available in 0.5 kg or 2 kg vacuum-sealed bags

Usage

Short-term effect is 2 measuring spoons or 85 g (for a body weight of 450 kg). Compose® 2x should be administered at least one (up to three) hours before loading, transport, training, performances in unfamiliar environments, grooming, health checkups, and similar activities.
Long-Term Use Administer Compose® 2x twice daily as a feed supplement. Dosage: one measuring spoon (42.5 g) per 450 kg of body weight in the morning and evening.
