Senior Plus, 20 kg

Art.Nr.: MS-SP / manufacturer:

30,05CHF

incl. 2,6% VAT plus Shipping

Currently out of stock.

- For Vitality & Resilience
- to maintain overall health
- Carefully balanced mineral and vitamin content
- Can be soaked

Senior Plus is a muesli formulated to meet the needs of older and convalescing horses, while being particularly palatable, energy-rich, and highly digestible. It stimulates the appetite of finicky senior horses and helps rehabilitation patients get back on their feet. At the same time, it boosts metabolism and, when fed regularly, helps prevent age-related loss of body condition. This “anti-aging muesli” ensures greater vitality, resilience, and a zest for life well into old age.
Senior Plus is a high-quality premium muesli: Thanks to its hydrothermally treated cereal flakes, it provides plenty of energy in an easily digestible form, ensuring that horses with age-related digestive slowdown and reduced metabolic function do not experience physical decline. Protein-rich ingredients such as brewer’s yeast, ground flaxseed, and pea flakes help with the coat change—which is often a problem for senior horses—and support muscle development in convalescing horses. As they age (for warmbloods, roughly from age 20 onward), horses need 20 to 25% more energy and protein than younger horses. Flaxseed, carrot flakes, and apple pomace are palatable and provide valuable omega-3 fatty acids, vitamins, and gut-supporting fiber. Seaweed extract meets the increased vitamin requirements of older horses (vitamins A, E, B complex, and C). Additionally, Senior Plus contains higher levels of trace minerals (copper, zinc, iodine, and selenium).

Product information

Senior Plus is also suitable for building muscle mass in horses of all ages. Together with Mash, Proluca, and Wiesen-Cobs, marstall offers a complete nutritional concept consisting of concentrated feed and roughage for horses with dental problems.
Composition: Barley flakes (35.00%), corn flakes (25.00%), oat flakes (10.00%), dried apple pomace (5.00%), flaxseed (5.00%), brewer’s grains (3.60%), brewer’s yeast (2.40%), flaxseed meal (3.00%), beet molasses (3.00%), pea flakes (2.00%), carrot flakes (1.00%), grass, high-temperature dried (1.00%), Sodium chloride (0.60%), seaweed meal (0.50%), calcium carbonate (0.50%), monocalcium phosphate (0.30%), magnesium oxide (0.25%)

Feeding Recommendation:
As the sole supplemental feed

- Small horse/pony: approx. 300 g per 100 kg body weight per day
- Thoroughbred: approx. 400 g per 100 kg body weight per day
- Warmblood: approx. 550 g per 100 kg body weight per day

Sample daily ration for a horse weighing 550 kg: as a sole supplemental feed with hay no work or light work approx. 2.0 to 3.0 kg
Please note: You may order a maximum of 1 bag of feed in our online store, as ordering more would exceed the weight limit for package shipping. For larger quantities, please contact us by email or phone!
