Color:	black
Clothing Sizes:	S
Suitability ♀/♂:	Women's, Men

GOOD PROTECTION FOR A SENSE OF SAFETY WHILE RIDING Ensuring safety without sacrificing comfort and discretion: That was the challenge we had to overcome when developing the Twist'Air airbag in collaboration with In&motion, a specialist in airbag solutions. Discover this next-generation airbag, manufactured in France and compliant with the new NF S72-800:2022 standard. As soon as the airbag deploys, it protects the cervical vertebrae, back, hips, spine, and neck. Its 42-gram gas charge makes it one of the airbags with the highest gas content on the market. The Twist'Air airbag falls under the category of PPE (Personal Protective Equipment). The vest’s ergonomic shape and bi-stretch material ensure it can withstand the airbag’s inflation while remaining

Product information

lightweight. The mesh fabric positioned along the ribs and back provides riders with the breathability they need during intense physical exertion. The cable connecting the rider to their saddle is magnetic: it can be attached and detached with one hand, so the reins do not need to be released. The airbag features a flat inner pocket and a flat cartridge, ensuring it fits snugly against the body. These two elements make the Twist'Air airbag one of the most discreet airbags on the market.
The airbag can be easily worn under one of our compatible jackets while riding: the Aerotech and Aeromesh models for competitions, and the Blouson Teddy and Bombers for training. The Twist'Air airbag is designed to be worn close to the body under compatible jackets. However, if you prefer to wear it over your jacket, we recommend choosing one size larger.

- Close-fitting cut and ergonomic lines - Adapted to the rider’s body shape
- Ergonomic design and lightweight materials - Can be worn under a jacket without adding bulk
- Stretch fabric and breathable - Optimal comfort
- Zip-up front and wide armholes - Does not restrict freedom of movement
- Stretch vest with cable routing on the right side—everything for your safety
- Composition—Main material 1: 94% polyamide, 6% spandex. Main material 2: 100% nylon Lining: 100% polyester
- Weight - 860 g in size M
- Standard - New NF S72-800:2022 standard
- Minimum rider weight required to wear the airbag - 20 kg
- Size Recommendation - To wear the Twist'Air airbag over a jacket, choose one size larger.
