Size of the bit:	13.5 cm
Thick bridle:	16 mm

This bit is frequently used in show jumping and eventing because—depending on how it is laced—it provides greater leverage. This allows the rider to apply pressure to the horse’s mouth and neck. The 2.5-ring snaffle bit offers various fastening options that allow for individualized pressure distribution and different effects on the horse’s neck and mouth. The continuous rings ensure that the anatomical mouthpiece is always positioned neutrally and rests gently in the horse’s mouth. The double-jointed Level 3 mouthpiece is shaped to exert more direct pressure on the horse’s cheeks. The center piece rests evenly on the horse’s tongue. This allows for quicker execution of one-sided half-halts in particular. Thanks to the continuous rings, the bit always returns to a neutral position in

Product information

the horse’s mouth. The SWEET Copper mouthpiece has a slightly sweet taste and is particularly well-accepted by horses; it can also encourage the horse to eat.
Advantages at a Glance Fastening Options and Effect

- stronger pressure on the horse’s cheeks and even pressure on the tongue
- More direct effect during one-sided half-halts
- The horse can move the bit independently within its mouth
- Various ways to fasten the reins to individually adjust the bit’s pressure on the mouth and neck as needed
- Option 1: Fasten the bridle to the small upper ring and fasten the rein to the large ring—light leverage on the poll
- Option 2: Attach the bridle to the small upper ring and the rein to the small lower ring—provides a slight lever effect on the mouth and poll
- CAUTION: Lever bits should only be used by experienced riders.

SWEET Copper

- Better acceptance: The sweet-tasting copper mouthpiece is particularly well-accepted by horses and encourages the horse to take the bit.
- 90% copper, 7% iron and aluminum; nickel-free and exceptionally durable

For which horses is this bit particularly suitable?

- For horses that lean on the bit
- For horses that pull upward
- For horses that tend to pull sharply forward

Sizes: 12.5 / 13.5 cm
Ring diameter: 70 x 130 mm
Thickness: 16 mm
