CellaVie® Dog Sport Powder

: Cell Nutrition for Performance. Dietary supplement for dogs

Brief Description

CellaVie® Dog Sport Powder is a high-performance cellular nutrition supplement for active dogs. With a powerful combination of collagen, krill, and 20% bioavailable Cell-K30-Nutrition® nucleotides, it acts like a cellular fast charger. It accelerates recovery after exercise, promotes red blood cell production, and strengthens the immune system for peak performance.

The cellular “fast charger” for maximum performance and lightning-fast recovery

Sports and high levels of physical activity place a heavy strain on your dog’s body. After every intense workout, cellular repair goes into overdrive. To regenerate muscles and boost performance, the body needs enormous amounts of cellular building blocks. During these phases of increased activity, the body’s own production quickly reaches its limits, which can slow down recovery and weaken the immune system.

The solution is CellaVie® Dog Sport Powder—the ultimate cellular nutrition for active dogs and high-performance four-legged athletes. The powerful formula combines proven ingredients such as collagen, krill, diatomaceous earth, and rose hips with an unbeatable 20% of the highly effective Cell-K30-Nutrition® nucleotides. These essential DNA and RNA building blocks act like a “rapid charger” for the cells. They support adaptation to stress, promote red blood cell production, and significantly accelerate repair processes. At the same time, they stabilize the immune system in stressful situations. Close the nutritional gap and give your dog the building blocks he needs for peak performance and optimal recovery.

5 reasons why CellaVie® Dog Sport Powder is good for your dog:

- **Acts like a cellular fast charger:** A full 20% Cell-K30-Nutrition® nucleotides measurably accelerate cellular repair processes after physical exertion.
- **Promotes maximum performance and endurance:** The nucleotides actively support the formation of red blood cells, which optimizes oxygen transport and, consequently, performance.
- **Supports rapid recovery:** Selected ingredients and herbs naturally enhance regeneration—the most important foundation for any lasting training success.
- **Stabilizes the immune system during physical exertion:** Physical activity places stress on the body; this cellular nutrition helps keep the immune system strong and intact during these demanding phases.
- **Closes the biological supply gap:** Since recovery after exercise consumes an extremely large amount of nucleotides, the powder ensures the essential external supply needed for optimized cell renewal.

Product information

Composition & Analytical Components

Composition: Collagen, krill, Cell-K30-Nutrition® nucleotides 20%, diatomaceous earth, rosehip.

Analytical Constituents:

- **Crude protein:** 61.00%
- **Crude fat:** 9.43%
- **Crude Fiber:** 3.90%
- **Crude ash:** 5.34%

Feeding Recommendations & Usage

- **Daily feeding recommendation:** 1 measuring spoon per 8 kg of body weight.
- **Usage:** Simply mix the powder into your dog’s regular food. You can also lightly moisten the mixture with water and then sprinkle it over the food to ensure optimal intake.
- **Special Notes:** Please always provide your dog with plenty of fresh drinking water. Ideal for working dogs, active companions, and for targeted support during periods of intense training or competition.
- **Storage:** Store in a cool, dry place away from light to preserve the effectiveness of the high-quality ingredients.
