Color: blue

The foam poles are available in a variety of bright colors and can be combined in any way you like. The poles are a great alternative to rigid and heavy wooden poles. Thanks to the soft foam core, the risk of injury during training is significantly reduced. It’s also possible to design workouts to promote targeted muscle building.

Material:
The poles are weather-resistant and made of very durable PVC. They can be stored outdoors, though sheltered storage is recommended. They retain their shape thanks to a solid foam core, lie flat on the ground, and have welded seams.
